# COURTCALL: Public Streaming

CourtCall's Public Streaming feature is a way for the public to view and hear proceedings online, in real time. Hosts will have access to enable public streaming at any time while in their conference. A shareable static link will be given to the conference Host to provide to the public. All parties wishing to view proceedings online will simply access the link while the Host has the feature enabled.

To Begin Public Streaming

1. Select the **'More'** button in the bottom control bar.

2. Select **'Enable Public Streaming'** within the *More* menu.

3. Select **'Default Stream'** from within the *Enable Public Streaming* pop-up menu, then press the **'Start Streaming'** button. A blue temporary banner will appear on the top-right corner of your screen letting you know that the conference is now being streamed.

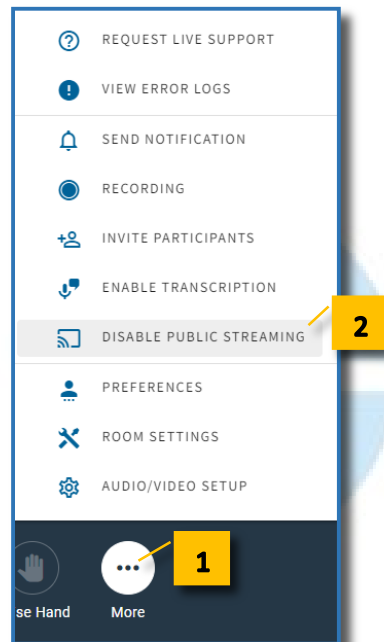

Press '**Start Streaming**'

To End Public Streaming

1. Select the **'More'** button in the bottom control bar.

2. Select **'Disable Public Streaming'** within the *More* menu.

4. Press **'Stop Streaming'**. A blue temporary banner will appear on the top-right corner of your screen letting you know that the conference is no longer being streamed.

Press '**Stop Streaming**'
